### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Patrick Billig on 8/25/2007.

Changes have been underlined:

Please change lines 13, and 14 in **Claim 1**,

**From**

"of an expiration date and an expiration time and is never subject to revocation, wherein the client program presents the short-term certificate to the application program for authorization"

**To**

"of an expiration date and an expiration time and is never subject to revocation, wherein as long as the at least one of an expiration date and an expiration time has not expired, the short-term certificate can still be used, wherein the client program presents the short-term certificate to the application program for authorization"

Please change lines 10-12 in **Claim 13**

**From**

“certificate and at least one of an expiration date and an expiration time and is never subject to revocation; and presenting the short-term certificate on behalf of the user to an application program”

**To**

“certificate and at least one of an expiration date and an expiration time and is never subject to revocation; wherein as long as the at least one of an expiration date and an expiration time has not expired, the short-term certificate can still be used, and presenting the short-term certificate on behalf of the user to an application program”

*Allowable Subject Matter*

Claims 1, 3,4,6-13, 15,16,18-24 are allowed.

As stated on the record in the previous office actions the most relevant art to the instant application are Riggins US 6,233,341 and Butt US 6,754,829

Riggins teaches a certificate authority issuing a long-term public key identity certificate (certificate) that binds a public key of the user to long term identification information (identifying information) related to the user, (Col 1 lines 54-67, Col 9 lines 1-2).

Art Unit: 2134

Riggins discloses a certificate authority (global server) for issuing a short term public key credential certificate (certificates that are short lived), (Col 3 lines 33-43). The certificate binds the public key of the user to long term identification information (long term certificate) and to short term authorization information (validity information, name, serial number), (Col 15 lines 13-35). The user presents this short term certificate to an application (web server) for authorization, (Col 14 lines 25-35). The client demonstrates knowledge of a private key corresponding to the public key in the certificate, (Col 5 lines 59-65, Col 6 lines 53-58).

Riggins does not specifically state short term authorization information related to a user. Riggins does not teach a short term certificate that is not subject to revocation prior to expiration.

Butt teaches that short lived certificates removes the need for revocation regardless of date/time, (Col 9 lines 36-37).

Both Riggins and Butt teach the short lived certificate may be destroyed when a session is ended at a terminal.

Both Riggins and Butt do not teach that as long as the at least one of an expiration date and an expiration time has not expired, the short-term certificate can still be used, as stated in Examiner Amended independent claims 1, and 13.
